

Missouri 2007 EQIP Conservation Practices and Financial Assistance

Conservation practices eligible for EQIP financial assistance are listed below. Conservation practice standards are located in the Missouri Field Office Technical Guide (eFOTG), available at <http://www.nrcs.usda.gov/technical/efotg>. Note: Cost share for some practices is only authorized when used in conjunction with, &/or as a component of, another EQIP cost-shared practice.

The EQIP applicant is responsible for the installation, use, and maintenance of all components required in the conservation management system.

Practice Code	Practice Unit	Conservation Practice	Cost-Share Rate		Method	Max. Cost Share \$	Practice Incentives			Lifespan
			NLRF or BF	LRF			Year 1	Year 2	Year 3	
702	Number	Agrichemical Mixing Facility	50%	75%	AC					15 years
311	Acre	Alley Cropping			FR		\$150	\$0	\$0	15 Years
365	Number	Anaerobic Digester - Ambient Temperature	50%	50%	AC	\$100,000				25 Years
366	Number	Anaerobic Digester - Controlled Temperature	50%	50%	AC	\$100,000				25 Years
316	Number	Animal Mortality Facility			AC					15 Years
		Existing Livestock Operation 1/	50%	75%

		Establishment When Temporary Irrigation is Needed			FR	\$4,000	\$2.00	\$0	\$0	
1/	An Existing livestock operation is: a. Currently in operation producing meat, milk, eggs, fiber, or other livestock-related marketable products; b. Consists of major physical facilities installed on the tract included in this EQIP application (i.e., swine house, milk barn, etc), AND 1) does not have an adequate livestock waste management system OR 2) has a livestock waste management system that currently is in need of retrofitting or rehabilitation OR 3) needs to add facilities due to a 50% or less increase in current/existing animal numbers.									
1/	An Expanding livestock operation is: a. An operation that meets the definition of an Existing livestock operation, with a greater than 50% increase in current/existing animal numbers, AND 1) <u>Low</u> Expansion: needs to add facilities due to a 50.1% through 150% increase in current/existing animal numbers OR 2) <u>Medium</u> Expansion: needs to add facilities due to a 150.1% through 250% increase in current/existing animal numbers OR 3) <u>Large</u> Expansion: needs to add facilities due to a greater than 250% increase in current/existing animal numbers.									
1/	All Other livestock operations: a. Applicant does not control the production of waste material from livestock production (i.e., applicant is the recipient of waste material from an operation that he/she has no influence in the day-to-day activities of that operation) OR b. Applicant is introducing a different type of livestock operation (i.e., current swine operation is adding a poultry house; current swine operation wants to change to a poultry operation) OR c. Applicant is introducing an entirely new livestock operation where no livestock operation currently exists OR d. An operation that does not meet the above definitions of Existing or Expanding.									
2/	Financial assistance limits of \$15,000 cost share for NLRF or BF or \$21,000 for a LRF apply to those EQIP offers where the applicant does not directly control livestock production. Requests in which the applicant directly controls the production of waste/litter are not subject to these financial assistance limits.									
3/	Cost share is 50% except specific practices identified for flat rate cost share in the Program Policies.									
AC	Average Cost									
BF	Beginning Farmer									
CNMP	Comprehensive Nutrient Management Plan									
FR	Flat Rate									
LRF	Limited Resource Farmer									
NLRF	Non-Limited Resource Farmer									
SCI	Soil Conditioning Index
